The ILX range includes the following 12 accredited titles:

PRINCE2® Foundation & Practitioner

The world's most widely used project management method. A collection of processes, roles and principles for the effective management of projects.

ITIL® Foundation

The world's most widely used approach to IT Service Management. A collection of processes, roles and principles for the effective design, delivery and development of IT Services.

APM Introductory Certificate for Project Management

Covering the essential skills and techniques of project management (an excellent pre-cursor to PRINCE2®).

ISEB/ISTQB Foundation & Intermediate Certificates in Software Testing

Essential guidance covering the tools and techniques which can be used to carry out and manage software testing.

APMP

Knowledge based qualification that allows candidates to demonstrate their knowledge of all elements of project management and their interdependencies.

Finance for Non-Financial Managers

Essential guidance for those with P&L responsibility who have not had any formal finance training.

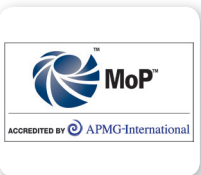

MSP® Foundation & Practitioner

The world's most widely used programme management framework. A collection of processes, roles and principles for the effective management of programmes.

M_o_R® Foundation

An essential framework for the management of strategic, programme, project and operational risk.

MoP™ Foundation

Essential guidance on how to apply principles, practices and techniques that help optimise an organisation's investment in change alongside its "business as usual" (BAU) work.

P3O® Foundation

Essential guidance on establishing the organisational infrastructure required to support multiple portfolios, programmes and projects.

MoV™ Foundation

An essential framework for ensuring the best value from the resources invested in programmes and projects thereby ensuring the best financial and non-financial benefits.

Programme & Project Sponsorship

Essential guidance for leaders of major programmes and projects encompassing leadership, people skills, governance and methods.
