

PRINCE2™ PRACTITIONER

The PRINCE2™ Practitioner Platinum Package

This fully accredited course is designed to help individuals become PRINCE2™ certified using a combination of interactive multimedia training, workshops and paper based exercises. The course contains all the material required to reach both Foundation and Practitioner level qualifications.

The package consists of a CD-ROM based PRINCE2™ Practitioner course, which combines multimedia training with interactive questions. The course begins with a comprehensive foundation level review, and then focuses on the knowledge required to successfully complete the practitioner exam.

There are lots of examples and exercises specifically written for this course including a simulated foundation exam, PRINCE2™ case study and templates to guide you through both aspects of the training, with example answers and marking schemes to give you plenty of practice. We are combining this with support from PRINCE2™ trainers, who will mark up your dry-run exam papers, giving you valuable feedback prior to attending a two day revision workshop. You can also call or email a PRINCE2™ trainer to answer any questions you may have.

One of the most difficult tasks of learning PRINCE2™ at Practitioner level is gaining access to case studies and exam materials. To address this, the course contains several scenarios and typical answers, showing how the marking schemes are applied.

How many staff can use this course?

The package allows you to train up to 5 staff over a 1 year time frame. Call now to take advantage of this offer!

What are the main benefits?

- Cost effective approach to becoming PRINCE2™ qualified
- Option to get sample papers marked by a trainer
- Full tutorial support
- Unique exam scenarios, answers and marking schemes
