

ILX PRINCE2® Foundation Exam *Snakes and Ladders* game

Here at ILX we're constantly striving to bring innovative ideas to our customers and engaging content to our learners. With the ILX PRINCE2® *Snakes and Ladders* game we think we've really hit the mark. Based on the traditional snakes and ladders board game, this highly engaging e-learning product provides learners with the opportunity to test their PRINCE2® knowledge in a fun and entertaining environment.

ILX's PRINCE2® *Snakes and Ladders* includes a large cross section of foundation level questions which are randomly selected as users progress through the game. To add a new 'twist' we've also included a selection of 'super' questions. These questions must be answered correctly to go up a ladder or to avoid sliding down a snake. Learners have the opportunity to avoid the perils of the snake by playing one of their 'Snake Cards' which provides the correct answer and saves the learner from a fate worse than death!

The game also includes multiplayer functionality, allowing head to head or team based participation. We've also included a choice of board sizes to allow the game to be played over longer or shorter durations.

One of the most important aspects of learning PRINCE2® is to feel confident in the exam, and this game provides a fun alternative to PRINCE2® Foundation exam practice and provides a valuable companion product to ILX's PRINCE2® e-learning and classroom learners.

Snakes and Ladders game

Game Features

- Game based PRINCE2® Foundation Exam revision tool
- PRINCE2® manual references on all questions
- Multiplayer and/or group play options
- Two levels of questioning, game contains 'super' foundation style questions
