

Implementing PRINCE2™ *for Real*™ Route Map

ILX Group's implementing PRINCE2™ *for Real*™ route map will help guide your organisation through your PRINCE2™ implementation. With sample templates, a health check product and a Project Management Guidebook that you can edit and make your own, this is a valuable tool to have in place – before, during and after your implementation.

The route map has been developed in line with the OGC PRINCE2™ Maturity Model (P2MM) and Portfolio, Programme and Project Maturity Model (P3M3), which focuses on the organisation gaining accreditation rather than individuals. If you are interested in pursuing this path then this product will certainly help to start your journey.

Benefits

The route map has been designed specifically to help you develop, plan and deliver your own effective implementation of the PRINCE2™ method and will help you to:

- Choose the right people for the right training course
- Develop one standard approach
- Tailor PRINCE2™ to fit in with your existing management processes
- Measure your progress
- Realise true business benefits

Target Audience

- Programme Managers/Directors
- Change Managers
- Project Managers/Directors
- Individuals who are responsible for rolling out PRINCE2™ within the business

Route Map Synopsis

▶ The Review Stage	▶ Development	▶ Transition	▶ Assessment
<ul style="list-style-type: none"> > Health Check > Development Plan 	<ul style="list-style-type: none"> > Detailed Investigation > Processes, Structures and Measures > Future Skills Needs > Current Skills > Training and Development Plan > Transition Plan 	<ul style="list-style-type: none"> > Training > Conversion > Control 	<ul style="list-style-type: none"> > Objectives > Assessment > Accreditation

What does the product contain?

> *Route Map*

A manual providing a step by step guide on the ILX Group's proven approach to implementing PRINCE2™. It covers four key management stages of Review, Development, Transition and Assessment. The main aim of these stages is initially to highlight the good and the bad in your project management processes and then to put a plan in place to improve them. At the end of all four stages you will be able to assess and measure the progress made.

> *Guidebook*

The guidebook is PRINCE2™, P2MM and P3M3 compliant and is written in an easy to read, non bureaucratic style. Its main aim is to give you an insight into how to create your own in-house guidebook to reflect your organisation's tailored approach to the method.

> *Resource CD*

An interactive multimedia programme that walks you through each of the four stages, providing you with sample documents, a health check product and useful hints and tips along the way.
